May 10, 1943.

Dear Joan.

It's almost a few decades ago I had received your letter and I am sorry I had not written to you any sooner. I know your anxieties to hear some news of Raymond so I'll start and get down to business, even though there isn't much news to write.

My, it's a lovely time to start snowing again when the birds are almost ready to be thinned by some farmers. It's fairly cold to-day and the temperature has dropped considerably. It started to snow around five and everything's white, but I wouldn't be a bit surprised to see it all melted by to-morrow night.

I hope you had a real good Easter holidays as for me, I spent my Easter holidays going to school. I didn't mind very much, for I believed I learned something.

Last week I forgot to take my excuse for being absent from school so the old Principal, Jacoby gave me some detention to do. Boy, was I failing. I could have knocked his block off that is if he had one. On Friday the grade tent and some other grades were shown a moving picture about spies. But you know every time there is something like that I'm never there to see it.

Gay, I heard L.E.H. had cadets for girls. Are you taking cadets? I sure think it's a good idea to have an organization for girls as well as for boys.

R.H.S. has cadets only for boys but I've never seen them practising because they have it at night from last week. I started to go as a school girl at Mrs. Hudsons and I am staying there till I have to go into hets. His family is very nice to me and I sure think alot of them. Mrs. Hudson teaches at the Grammar school out at the Ridge.

News or no news. I like to announce the birth of our twin kittens which were born to last week. They're still blind but are getting fluffier and cuter each day.

There been quite a few weddings this spring and I think theres going to be a deal wedding on Sat. at half past ten now and I still have to write a composition for to-morrow. I really was supposed to be handed in on Fri. but I wasnt there so I have a chance till to-morrow. Thank Goodness. I guess you could picture me and Emee going to Agou for help every time we had any written work to hand in when I mention "composition".

Well, I better close now. Good-bye and good-luck. tell I write again

Yours Friend
Teruk Sheda

P.S. I would appreciate very much if you'd send me your snapshot. Maybe you're wondering why I write on this paper instead of writing tablet but the truth is I'm too busy to buy one just now so I'll have one by next time.
